Adherence to Energy Efficiency Standards Established by Federal and State Laws.
All lamps and ballasts sold under this contract shall meet or exceed all applicable provisions of the National Energy Independence and Security Act of 2007. For more information about federal energy-efficiency standards, see <http://www.gpo.gov/fdsys/pkg/BILLS-110hr6enr/pdf/BILLS-110hr6enr.pdf>. Additional energy efficiency requirements are established in the specifications below. They include a requirement that self-ballasted compact fluorescent lamps (CFLs) be on the current list of ENERGY STAR Certified Light Bulbs (see <http://www.energystar.gov/productfinder/product/certified-light-bulbs/results>). Similarly, four-foot T8 lamps and corresponding ballasts must be on the Consortium for Energy Efficiency's list of "extra-efficient" Commercial Lighting Qualifying Products, which can be found at <http://library.cee1.org/content/commercial-lighting-qualifying-products-lists>. For other types of fluorescent lamps, a minimum color rendering index (CRI) level is set because high-CRI lamps typically have a higher efficacy (measured as lumens per watt) as well as improved (rated life) compared to lower-CRI lamps of the same wattage.

Adherence to Vermont Act 36's Requirement that Manufacturer's Offer Lamp Collection and Recycling Program
On May 19, 2011, the State of Vermont enacted Act 36 Relating to the Collection and Disposal of Mercury-Containing Lamps. Under §7152 of the Act, "manufacturers of mercury-containing lamps are prohibited from selling a mercury-containing lamp unless they are implementing an approved collection plan, pay a fee to the state, are listed on the Vermont Agency for Natural Resources (ANR) web site as covered by an approved plan, and meet several other requirements." This requirement became effective July 1, 2012. A list of approved manufacturers can be found at <http://www.lamprecycle.org/state-local-laws/vermont/participating-manufacturers/>. Accordingly, vendor must offer only lamps and ballasts from manufacturers that are currently on the ANR list of approved manufacturers. In addition, vendor must offer recycling services for lamps and ballasts in order to be considered for award under this contract.

Adherence to Mercury-Content Standards Established by Vermont State Laws
Act 36, §7159 establishes mercury content standards for all lamps sold in the State of Vermont. The law states, "Beginning January 1, 2013, a mercury-containing lamp sold in this state shall satisfy the mercury-content standard for lamps set by California." California's law has required that state to follow mercury content limits established by the European Union in its 2002 Restriction of Hazardous Substances (RoHS) Directive. For more information, see https://dtscc.ca.gov/HazardousWaste/UniversalWaste/RoHS_Lighting.cfm. The mercury content limits establishing in these specifications are at least as stringent as those in the 2002 RoHS Directive and are based on a market assessment of available products offered by major US manufacturers by category.

Adherence to Other Standards References in These Specifications
Specifications and standards in effect on the opening of this contract shall form a part of this contract, where referenced. The State requires vendor to comply with all applicable and current environmental, health and safety, energy efficiency and other performance standards throughout the life of this contract that have been adopted by Federal and State governing bodies and that are referenced in these specifications. This includes, but is not limited to, all applicable standards adopted by the American National Standards Institute (ANSI), Illumination Engineering Society of North America (IES), Underwriters Laboratories (UL), National Fire Protection Association (NFPA), US Department of Energy (DOE), US Department of Transportation (DOT), US Environmental Protection Agency (EPA, including the ENERGY STAR Program), Consortium for Energy Efficiency (CEE) and National Electrical Manufacturers Association (NEMA). All performance specifications shall be measured in accordance with these standards.

3. Collaboration with Efficiency Vermont: Collaboration with Efficiency Vermont: Vendor shall participate in Efficiency Vermont's "SMARTLIGHT" program. Under the terms of the program, vendor agree to collect the following information for each Qualifying Equipment sale and submit to Efficiency Vermont monthly using the Efficiency Vermont supplied Excel spreadsheet:

- 3.1. The date of each sale
- 3.2. The type of Qualifying Equipment sold
- 3.3. The quantity for each sale
