

BGS Cleaning Instructions for Oxivir TB Wipes in a Shared Workspace

- ❖ Shared workspace should be cleaned and disinfected at the start of each shift.
- ❖ Do not store product in freezing or excessively hot temperatures such as in a vehicle.
- ❖ Wash hands with soap and water for 20 seconds before using disinfecting wipes. Thoroughly dry hands.
- ❖ Pre-clean heavily soiled areas with soap and water or use an all-purpose cleaner. If the area is only lightly soiled, use an additional disinfecting wipe to pre-clean.
- ❖ Remove one disinfecting wipe from the tub or packet. Close the lid to prevent the remaining wipes from drying out.
- ❖ Apply the wipe to the surface to be disinfected. Work from clean to dirty in an “S” shape. Use enough fresh wipes to thoroughly wet the surface, with each side of the wipe cleaning a different surface.
- ❖ **Surfaces must remain visibly wet for at least 1 minute. Allow surface to air dry.**
- ❖ Dispose used wipes in a lined waste bin or trash can. **Do not flush wipes.**
- ❖ Immediately wash hands with soap and water for 20 seconds. Thoroughly dry hands.
