

MuleSoft's Anypoint Platform

Vermont's Integration Platform (IP) Solution

What is Mulesoft?

The Mulesoft - Anypoint Platform is an Integration Platform Solution. Integration Platforms are solutions that connect or glue IT systems together using various transfer methods. The capabilities include:

- Jumpstart projects with a single marketplace for APIs and integration assets
- Integrate applications by designing and building APIs at lightning speed
- Deploy easily to any cloud and on-premises with a single runtime
- Simplify troubleshooting and real-time monitoring

Who uses Anypoint?

The Department of Vermont Health Access is using Anypoint to solve their their system/data integration needs. Outside of the state, the Anypoint Platform is used by 1600 customers; including the Federal government, Colorado, New York, Maryland and others.

How is Anypoint being used?

The Anypoint Platform is being implemented by the Integrated Eligibility & Enrollment Premium Processing solution. The solution will be used to transfer health insurance enrollment information to Carriers such as Blue Cross/Blue Shield, MVP, and Northeast Delta.

Why use Anypoint?

Anypoint is a cornerstone platform for the State of Vermont. Anypoint allows applications to interact with each other in sustainable and manageable ways. Connect legacy systems to cloud applications to bring data directly to where it's needed

Quick Facts

The Anypoint Platform is used by over 1600+ businesses

Cost Model: Per connector and shared subscription

Gartner names MuleSoft as the only Leader in both full life cycle API management and enterprise iPaaS

MuleSoft has an extensive library of prebuilt APIs, connectors, and other integration assets

MuleSoft's Anypoint Platform

Vermont's Integration Platform (IP) Solution

What's next for Anypoint?

We are working to build upon the current use and adoption of the Integration Platform in three distinct areas.

- A Vermont team has been built to focus on building and maintaining this solution along with building out any APIs or Integration points between existing systems as needed.
- Second, we will continue to build on integrations out for additional IE&E projects, such as Online Application and the case management system (Salesforce). Salesforce.
- Lastly, we are building a process in which we can onboard other departments and agencies, starting with some inflight projects within the Agency of Human Services such as MMIS.

Where can I learn more about Anypoint?
