

## Agency of Digital Services (ADS) Mission and Structure

ADS is responsible for supporting the Administration's goals of growing the economy, making the State more affordable, and protecting the most vulnerable. Its mission is to work together with its partners in state government to deliver simple and intuitive technology solutions that improve the lives of the citizens of Vermont.

To meet its vision and goals, ADS is committed to proactively providing enterprise-wide cost-effective, customer-focused information technology (IT) services and solutions in a secure, reliable, and up-to-date manner.

ADS brings together technical and business professionals from across the Executive Branch to support the ongoing, statewide transition to digital government. Examples of this work include continuous evaluation and improvement of systems that deliver support to Vermonters and State employees—for example, turning Vermonters' feedback into improved and enhanced experiences with government interactions. ADS also manages strategic investments in technology and manages the timing and pace of digital government enhancements.

ADS is organized into six divisions and the seven IT Directors embedded with our partners in State government:

- Security Division, led by the Chief Information Security Officer (CISO)
- Enterprise Architecture Division, led by the Chief Technology Officer (CTO)
- Data Management Division, led by the Chief Data Officer (CDO)
- Finance Division, led by the Chief Financial Officer (CFO)
- Enterprise Project Management Division, led by the Director of Enterprise Project Management (EPMO)
- Artificial Intelligence Division, led by the Director of Artificial Intelligence (AI)
- Seven IT Directors are embedded within our partner agency organizations, each responsible for the day-to-day management of partner IT projects and initiatives.

For an ADS organization chart, see the final page of the ADS Strategic Plan, 2023-2027 in the Bidders' Library.
